*Improve operator comfort by either straddling windrows or driving in between them.*

*Utilize the center draper to merge up to 80' together for chopping or flip up the draper to merge and/or invert windrows together or individually.*

## **Merging and Turning Options**

### **Dry Hay Applications**

*This machine will merge and/or invert from 9' to 18' windrowers or invert windrows individually. It will also combine up to four windrows for baling in light yield conditions.*

### **Haylage Applications**

*Combine up to 80' of product for greater chopper efficiency. Merge any combination of two to five windrows to accommodate desired chopper capabilities.*

# PhiBer Swath Turners/Mergers

PhiBer Swath Turners/Mergers

## PhiBer Versatility!

*This machine is designed to be as versatile as one can imagine. With drapers and pick-ups that are adjustable, nearly any windrow configuration can be achieved for either dry hay baling or merging for chopping.*

Moving from field to field is very simple with this machine. Go from field position to transport and back to field position all from the comfort of your tractor cab. A control handle mounted in the tractor guides the operator through this process.

# Specifications

Working width min.	26'8"
Working width max.	30'8"
Working length	18'
Transport width	11'6"
Transport length	35'8"
Weight	6860lbs
Tongue weight field position	600lbs
Working tires	8 tires - 20.5/8-10
Transport tire	1 tire - 26/12-12
Tractor requirements	18gpm@2500psi min / 24gpm@2800psi max.
Pick-up type	Sectional one piece rubber belt with teeth
Pick-up tires	4 tires - 18/8.5-8 with trailing skids
Pick-up width	8' or optional 10'
Draper width	42" or optional 48"
Draper length	144"
Center draper	Optional 72"
Sliding drapers	36" of travel
Bi-directional drapers	Standard
Inverter chutes	Optional
